

## 第2回 リフレクションクラック国際会議報告

鈴五商事(株)井上 公 二

1. 日 時：1993年3月10～12日

2. 場 所：ベルギー、リエージュ市 コングレス会場

3. プログラム

①イントロダクション及びキーノート

リゴー教授、モルナー教授、コロンビエール教授、フランケン博士、ジャクリン博士

②舗装におけるリフレクションクラックのデザインモデル

発表6件

③舗装のリフレクションクラックの評価方法

発表11件

北海道学園大学 大久保教授から北海道のテスト結果が発表された。

④舗装におけるリフレクションクラックの抑制の計測

発表9件

⑤ケースヒストリー

発表16件

鈴五商事(株)井上が日本における広幅シートの発表、特に10年間の追跡を評価された。

(なお論文提出時は日本シール精工(株)に所属していた。)

リフレクションクラックは欧州においても非常な問題であり、米国と同じレベルに早く到達したいと意欲的な発表がおおかった。

今回は前回の第1回に比べて日本からの参加者が少なく、北海道学園大学の久下教授、日本道路の久下氏(スウェーデンから参加)、鈴五商事の井上の3人であった。

以 上

※次頁以降にプログラムを紹介します。

Scientific Committee	xiii
Conference Organization	xiv
Preface	xv
<b>PART ONE INTRODUCTION AND KEYNOTE PAPERS</b>	<b>1</b>
<b>1 General introduction, main conclusions of the 1989 Conference on Reflective Cracking in Pavements, and future prospects</b> J.M. RIGO <i>Chairman, RC93; Chairman, RILEM TC 97-GCR; Construction Materials Laboratory, University of Liege, Belgium</i>	3
<b>2 Evaluation of pavement structure with emphasis on reflective cracking</b> A.A.A. MOLENAAR <i>Road and Railway Research Laboratory, Delft University of Technology, Netherlands</i>	21
<b>3 Les procédés utilisés pour maîtriser la remontée des fissures: bilan actuel (Retarding measures for crack propagation: state of the art)</b> M.G. COLOMBIER <i>Laboratoire Régional des Ponts et Chaussées d'Autun, France</i>	49
<b>4 Laboratory simulation and modelling of overlay systems</b> L. FRANCKEN <i>Belgian Road Research Centre, Brussels, Belgium</i>	75
<b>5 Geotextile use in asphalt overlays – design and installation techniques for successful applications</b> F.P. JAECKLIN <i>Geotechnik Consulting Engineers, Ennetbaden, Switzerland</i>	100

<b>PART TWO DESIGN MODELS FOR REFLECTIVE CRACKING IN PAVEMENTS</b>	<b>119</b>
<b>6 CAPA: a modern tool for the analysis and design of pavements</b> A. SCARPAS and J. BLAAUWENDRAAD <i>Structural Mechanics Division, Delft University of Technology, Netherlands</i> A.H. de BONDT and A.A.A. MOLENAAR <i>Road and Railroad Research Laboratory, Delft University of Technology, Netherlands</i>	121
<b>7 Semirigid pavement design with respect to reflective cracking</b> I. GSCHWENDT <i>Slovak Technical University, Bratislava, Czechoslovakia</i> I. POLIAČEK <i>Viaconsult, Bratislava, Czechoslovakia</i> V. RIKOVSKÝ <i>Research Institute of Civil Engineering, Bratislava, Czechoslovakia</i>	129
<b>8 Numerical modelling of crack initiation under thermal stresses and traffic loads</b> A. VANELSTRAETE and L. FRANCKEN <i>Belgian Road Research Centre, Brussels, Belgium</i>	136
<b>9 Evaluation of crack propagation in an overlay subjected to traffic and thermal effects</b> J.M. RIGO, S. HENDRICK, L. COURARD and C. COSTA <i>Geosynthetics Research Centre, Materials Research Centre, University of Liege, Belgium</i> S. CESCOTTO <i>M.S.M., University of Liege, Belgium</i> P.J. KUCK <i>Hoechst, Bobingen, Germany</i>	146
<b>10 Design of asphalt overlay/fabric system against reflective cracking</b> B. GRAF <i>Consulting Engineer, Zurich, Switzerland</i> G. WERNER <i>Geosynthetics Consulting, Polyfelt GmbH, Linz, Austria</i>	159
<b>11 Design limits of common reflective crack repair techniques</b> T.R. JACOB <i>Owens Corning Fiberglas, Granville, Ohio, USA</i>	169

<b>PART THREE ASSESSMENT METHODS FOR REFLECTIVE CRACKING IN PAVEMENTS</b>		
<b>12 Apparatus for laboratory study of cracking resistance</b>	177	<b>19 Study on reflection cracks in pavements</b>
H. DI BENEDETTO and J. NEJI		K. SASAKI
<i>Laboratoire Géomatériaux, ENTPE, France</i>		<i>Civil Engineering Research Institute, Hokkaido Development Bureau, Japan</i>
J.P. ANTOINE and M. PASQUIER		H. KUBO
<i>Gerland Routes, Corbas, France</i>		<i>Faculty of Engineering, Hokkaigakuen University, Japan</i>
<b>13 Investigations on the effectiveness of synthetic asphalt reinforcements</b>	187	K. KAWAMURA
P.A.J.C. KUNST		<i>Civil Engineering Research Institute, Hokkaido Development Bureau, Japan</i>
<i>Netherlands Pavement Consultants, Hoevelaken, Netherlands</i>		<b>20 Processes reducing reflective cracking: synthesis of laboratory tests</b>
R. KIRSCHNER		Ph. DUMAS and J. VECOVEN
<i>Huesker Synthetic GmbH, Gescher, Germany</i>		<i>Public Road Laboratory of Autun, France</i>
<b>14 A new test for determination of fatigue crack characteristics for bituminous concretes</b>	193	<b>21 Paving fabric specification for asphalt overlays and sprayed reseal applications</b>
S. CAPERAA, E. AHMIEDI and C. PETIT		W. ALEXANDER
<i>Civil Engineering Laboratory, University of Limoges, Egletons, France</i>		<i>Geofabrics Australasia Pty Ltd, Melbourne, Australia</i>
J-P. MICHAUT		R. McKENNA
<i>Colas Society, Paris, France</i>		<i>Geosynthetic Testing Services, Albury, Australia</i>
<b>15 Dynamic testing of glass fibre grid reinforced asphalt</b>	200	<b>22 New testing method to characterize mode I fracturing of asphalt aggregate mixtures</b>
M.H.M. COPPENS		E.K. TSCHEGG
<i>Netherlands Pavement Consultants, Hoevelaken, Netherlands</i>		<i>Technical University of Vienna, Austria</i>
P.A. WIERINGA		S.E. STANZL-TSCHEGG
<i>Chomarat, Mariac, France</i>		<i>University of Agriculture, Vienna, Austria</i>
<b>16 On the thermorheological properties of interface systems</b>	206	J. LITZKA
L. FRANCKEN and A. VANELSTRAETE		<i>Technical University of Vienna, Austria</i>
<i>Belgian Road Research Centre, Brussels, Belgium</i>		<b>PART FOUR RETARDING MEASURES FOR REFLECTIVE CRACKING IN PAVEMENTS</b>
<b>17 Influence of modulus ratio on crack propagation in multilayered pavements</b>	220	
C. PETIT and S. CAPERAA		<b>23 The precracking of pavement underlays incorporating hydraulic binders</b>
<i>Civil Engineering Laboratory, University of Limoges, Egletons, France</i>		G. COLOMBIER
J-P. MICHAUT		<i>Laboratoire Régional des Ponts et Chaussées, Autun, France</i>
<i>Colas Society, Paris, France</i>		J.P. MARCHAND
<b>18 Reflective cracking in asphalt pavements on cement bound road bases under Swedish conditions</b>	228	<i>Cochery Bourdin Chausse, Nanterre, France</i>
J. SILFWERBRAND		
<i>Swedish Cement and Concrete Research Institute, Stockholm, Sweden</i>		

24	<b>Treatment of cracks in semi-rigid pavement: cold microsurfacing with modified bitumen emulsion and fibers: Spanish experience</b>	343
	R. ALBEROLA <i>Ministry of Public Works and Transport, Madrid, Spain</i> J. GORDILLO <i>E.S.M. Research Center, Madrid, Spain</i>	
25	<b>Application of geosynthetics to overlays in Cracow region of Poland</b>	
	W. GRZYBOWSKA, J. WOJTOWICZ and L. FONFERKO <i>Cracow University of Technology, Cracow, Poland</i>	
26	<b>Minimization of reflection cracking through the use of geogrid and better compaction</b>	
	A.O. ABD EL HALIM and A.G. RAZAQPUR <i>Center for Geosynthetic Research, Information and Development, Carleton University, Ottawa, Canada</i>	
27	<b>New system for preventing reflective cracking: Membrane Using Reinforcement Manufactured On Site (MURMOS)</b>	
	J. SAMANOS <i>Screg Routes, France</i> H. TESSONNEAU <i>Screg Sud-Est, France</i>	
28	<b>The use of a polypropylene bituminous composite overlay to retard reflective cracking on the surface of a highway</b>	
	A.R. WOODSIDE, B. CURRIE and W.D.H. WOODWARD <i>Department of Civil Engineering and Transport, University of Ulster, Jordanstown, Northern Ireland</i>	
29	<b>Fabric reinforced chip seal surfacing and resurfacing</b>	
	C.J. SPRAGUE <i>Sprague and Sprague Consulting Engineers, Greenville, USA</i> D.M. CAMPBELL <i>Hoechst Celanese Corporation, Spartanburg, USA</i> P.J. KUCK <i>Hoechst AG, F+E Spunbond, Bobingen, Germany</i>	
30	<b>Jute fibre for production of non-woven geotextiles to prevent reflective cracking in pavements</b>	
	S.N. PANDEY and A.K. MAJUMDAR <i>J.T.R.L., (I.C.A.R.), Calcutta, India</i>	
31	<b>Bituminous pre-coated geotextile felts for retarding reflection cracks</b>	343
	M. LIVNEH, I. ISHAI and O. KIEF <i>Transportation Research Institute, Technion-Israel Institute of Technology, Haifa, Israel</i>	
	<b>PART FIVE CASE HISTORIES</b>	351
32	<b>Comparative sections of reflective crack-preventing systems: four years evaluation</b>	353
	G. LAURENT <i>C.E.T.E. de l'Ouest, Nantes, France</i> J.P. SERFASS <i>Screg Routes, Guyancourt, France</i>	
33	<b>Assessment of methods to prevent reflection cracking</b>	360
	M.E. NUNN and J.F. POTTER <i>Transport Research Laboratory, Crowthorne, UK</i>	
34	<b>Experience of Du Pont de Nemours in reflective cracking: site follow up</b>	370
	G. KARAM <i>Du Pont de Nemours, Luxembourg</i>	
35	<b>Soft pavement wide interlayer in Japan</b>	378
	K. INOUE <i>Japan Seal Industries Co. Ltd, Osaka, Japan</i>	
36	<b>The application of a geotextile manufactured on site on the Belgian motorway Mons-Tournai</b>	384
	R. DUMONT <i>Walloon Ministry of Infrastructure and Transport, Mons, Belgium</i> Y. DECOENE <i>Screg Belgium, Brussels, Belgium</i>	
37	<b>Belgian applications of geotextiles to avoid reflective cracking in pavements</b>	391
	Y. DECOENE <i>Screg Belgium, Brussels, Belgium</i>	
38	<b>Prevention of cracking progress of asphalt overlayer with glass fabric</b>	398
	ZHONGYIN GUO <i>Tongji University, Shanghai, P.R. China</i> QUANCAI ZHANG <i>Taiyuan Highway Administration, P.R. China</i>	

<p>39 Long term performance of geotextile reinforced seals to control shrinkage on stabilized and unstabilized clay bases P. PHILLIPS <i>Geofabrics Australasia, Sydney, Australia</i></p>	406	<p>46 Thin overlay to concrete carriageway to minimise reflective cracking I.D. WALSH <i>Engineering Services Branch, Kent County Council, Maidstone, UK</i></p>	464
<p>40 In situ behaviour of cracking control devices M. LEFORT and D. SICARD <i>Laboratoire Régional de l'Ouest Parisien, Trappes, France</i></p>	413	<p>47 Design and first application of geotextiles against reflective cracking in Greece A. COLLIOS <i>Edafomichaniki Ltd, Athens, Greece</i></p>	482
<p>41 Asphalt overlay on crack-sealed concrete pavements using stress distributing media G. HERBST <i>Central Road Testing Laboratory, Road Administration of Lower Austria, St Pölten-Spratzten, Austria</i> H. KIRCHKNOPF <i>Road Construction – Department 2, Road Administration of Lower Austria, Tulln, Austria</i> J. LITZKA <i>Institute for Road Construction and Maintenance, Technical University of Vienna, Austria</i></p>	425	<p>Author index</p> <p>Subject index</p>	488 489
<p>42 Experimental project on reflection cracking in Madrid R. ALBEROLA <i>National Highway Department, Madrid, Spain</i> A. RUIZ <i>Centro de Estudios y Experimentación de Obras Públicas, Madrid, Spain</i></p>	433		
<p>43 Two kinds of mechanism of reflective cracking SHA QING-LIN <i>Research Institute of Highways, Beijing, P.R. China</i></p>	441		
<p>44 Movements of a cracked semi-rigid pavement structure A.H. de BONDT <i>Road and Railroad Research Laboratory, Delft University of Technology, Netherlands</i> L.E.B. SAATHOF <i>Road and Hydraulic Engineering Division, Ministry of Public Works, Transport and Water Management, Delft, Netherlands</i></p>	449		
<p>45 A crack-resistant surface dressing: the results of 8 years of application, and future prospects J.P. MARCHAND <i>Cochery Bourdin Chaussée, Nanterre, France</i></p>	458
